Supermap On Demand Pdf 117 Download complete image for.Q: In vuejs, how do you get data from /api/v1/data and style it? My app is an app that is showing some data from the API and styling it. I've had a look at vue-resource and the direct fetch method but I just can't get it to work. In the vuejs example of direct fetch, they're using axios. The basic thing I'm trying to do is getting some data from the API and showing it in the HTML. Specifically, I'm trying to get some data and then show it in , like this: {{ first_name }} In my main.js I have:

```
Vue.http.headers.common['X-API-KEY'] = '63871e5b5b1aa7c4f2ffa9cb13f5489' const API_URL = "" const route = { path: '/v1/data', methods: { data(req, res) { return {
```
