Windows 8.1 Activator is supported by all Windows 8.1 versions including "Embedded Industry Pro Evaluation" (180 day trial). Please feel free to try it out and share your experience with us.

1. Field of the Invention The present invention relates to a method of controlling an air conditioner and a vehicle air conditioner system.

2. Description of the Related Art Japanese Patent Laid-Open Publication No. 2002-74939 describes a conventional control method for an air conditioner. According to this conventional technique, the defrosting operation of the air conditioner is performed when the temperature of the air in a vehicle passenger compartment is low. In the conventional technique, the defrosting operation of the air conditioner is performed at a selected state when a vehicle speed is set to be lower than a predetermined value, and at a selected state when a door is opened for a long time. In other words, according to this conventional technique, an operator selects one of the operations of the air conditioner depending on a state of the vehicle. However, according to the conventional technique, an engine stop condition is not taken into consideration. Therefore, even if the door is opened for a long time, it is not judged that the operator wants to stop the engine. Consequently, the engine is not stopped in such a case. This may cause an uncomfortable situation for the operator, and may also cause a delay in stopping the engine.

The "A" Side: The Grey's Anatomy Nurse-to-Nurse Interview In light of the recent hospital drama, Grey's Anatomy, which centers on a day in the lives of a group of patients and nurses at Seattle Grace Mercy West Hospital, I was curious to see what the nurses thought about the show, and what kind of problems they think they would face at work. I found out that though everyone who worked at the hospital was in the show (except for one patient played by Kate Walsh) they were extremely hard to get ahold of, because as everyone knows, the show is only on air for one hour each week. But what we saw in that hour was so much more than we could have imagined.

Me: I think you're a writer who wants to work at the hospital. Shannon: I'm 2d92ce491b
