alexanderjameskey.com/media/fonts/black--sonic.zip.Q: Checkbox checked not working for dynamically added elements in jQuery I've dynamically added checkboxes with IDs and values using jQuery's.append() function. The values are being saved in the database. I've used.prop("checked") method to check the status of a checkbox. But the status gets changed only for the first added element. If a second element is added then the status stays the same. What am I doing wrong here? HTML: Project Id
