The Folder: Here is the folder in question: What is happening here? Why do I have files of a NTFS driver in my PC? I didn't install anything like that. What is the full path of that NTFS driver? Can I remove those files? How? Thank you. A: I fixed my problem by installing NTFS Backup 3.1. After installing that software I got several options to backup files or entire drives with that software. Now I can backup all of my important files from the problematic folder I mentioned above. A second user, Bredol, presents his theory of why the regime should want to improve teacher quality and to improve access to early childhood education. He works on education policy and advocacy for the non-profit group Advocacy for Children's Rights. Bredol's primary argument for improving early education policy is that "the way to improve [access to early education] is to focus on improving quality." He explains that education policy that focuses on access without improvement in quality will result in access

without quality. Bredol said that he thinks that one of the key reasons why the regime is so keen on improving teacher quality is because of how it impacts girls. He notes that only a quarter of primary school girls, and an even smaller share of secondary school girls, are enrolled in one of the ten-year plan's targeted programmes. Bredol notes that the regime claims this is because girls do not like school. However, the regime doesn't address the problematic curricula, or the underdevelopment of school infrastructure. This means that if the regime had better school infrastructure, then the regime would have more options to offer girls who do want to attend school. Furthermore, Bredol argues that one of the key factors that prevent girls from accessing education is violence against girls. Rather than directly addressing the underlying causes of violence against girls, Bredol argues that targeted programmes to improve school infrastructure will be more effective than policies that only discuss access. Bredol believes that as the regime improves teacher quality, it will be more effective in reaching more girls. A third user, "Sachar D," presents his argument for why the regime would not be interested in improving access to early childhood education. Sachar is a research consultant and one
