The same week, New Scientist called him “one of the most stimulating thinkers in the world today.” Originally published on Edge.org. Discuss this post on reddit This is an updated version of an article originally published in December 2012. More from Edge.org: The Best and the Brightest The Quantum Revolution in Science The Great Influenza Proof of the Invisible HandMarch 31, 2014 The world is changing. The classical economics wisdom that economic life should be stable, conservative, and regular has been overturned. The central lesson is that in an entrepreneurial and innovative economy, the financial system needs to be creative and responsive. In a market economy, a central bank cannot easily be expected to take the leading role in ensuring stability, as in a fiat monetary system. Any central bank is a government institution and, in principle, a politically driven institution. This raises the question of how a central bank can be flexible and creative in an environment that challenges the regularity of economic life. We need to understand that the modern finance system does not comply with the traditional conservative assumptions of stability, predictability, and regularity. Finance has, in a sense, become a very political and entrepreneurial institution. The trouble with money Money is different from other kinds of goods. Money, for example, is “good” even if nobody wants to consume it. You can make a table out of a sheet of paper. Even if nobody wants to consume the table, the table is a “good.” Money, on the other hand, is not a “good” if nobody wants to hold it. Money is also different from other kinds of goods because it is a “commodity”
