.The primer is a potent inducer of the plant immune system. The prime stimulates host phytoalexin, pathogenesis related gene, glycoproteinase, tannins, RNAi and other processes. These three technologies, used in concert, produce a synergistic effect that provides plant and fungal health by: 1) Stimulating plant immune response 2) Biofungal colonization 3) Directing plant nutrition 4) Inducing host defense responses that protect plants from both biotic and abiotic stresses. Even for my personal purchase of textbooks, I'm not seeing adoption of ebooks at the rate I expected, and many of my students are using the hard copy of their textbooks. Some experts I talked to say that the reason we are seeing a slow adoption is due to a natural learning curve. With the natural learning curve of people adjusting to new technology, you can see this as a trend. We often see a group of people that are introduced to a new technology and try it out, and then a small group that is introduced and uses it. Over time, the small group is growing and the group of people that are introduced is decreasing. This is the natural learning curve of new technology, and it's happening with ebooks. However, that's not to say there isn't a shift in the adoption rate. A report from the National Association of College Stores says that they found that there are now more college graduates with ebook readers than without. And, in another report, most of those who said they would buy a Kindle over a paperback were from the age group of 25 and up. I think the biggest factor for these trends is that ebooks still feel like a second rate technology. People are having a hard time adjusting to the idea that they don't have to hold a book in their hands to read it. Many feel that they can't afford the large screen size for the ebooks that are currently on the market. They feel that the current ebooks are too small and have a smaller screen than the size of the paperback books that they are used to. However,
