After a lot of searching I found out that my computer (laptop) was infected with a Trojan virus and when I tried to install the virus remover I was continuously downloading more of these files. They installed and I started getting pop ups at the same time each day. They where for a while and I thought they were gone but they came back. I can't get rid of them no matter how hard I try. Is there a site where I can get the real virus? is there a way to know what files they were trying to download? I need help. I hope

---

someone can help me or tell me where I can get the virus removed. I am not the one that posted that, I would like to read and see what others think of it. I have an issue that I don't think anyone will be able to help me with. I downloaded an app that was on the Play store and I am not able to remove it. I have tried everything I have found on the internet and none of it works. Is there any hope that someone can help me please? It is a rooted device. I am so tired of this I can't even type anymore. thanks for your help!

---

When you download it to your PC, do you see the games? I have this app called Tapster and every time I launch the app, it takes up 4-5gb on my phone. I am not sure how to remove it, I have tried reinstalling the app but it doesn't go away. I am not able to clear memory or anything, I have a Galaxy S4 mini. Yes, I can see the games but I have no idea how to remove them. I am on the phone with my IT department and we are on a bit of a dead-end because it didn't come from the app store. I think the files are hidden

---

somehow. I am also on a rooted phone. I have a Samsung Galaxy Note 4. I would love to know if there is a way to clear the memory but I don't know how to do that. I downloaded a full album of selenagomez phone numbers and I can't seem to get rid of them. What are they for? What should I do to get them off my phone? What is the app name? What happens when you click on the app? Are there games inside it? 2d92ce491b
