Category:1991 non-fiction books Category:Computer programming books Category:Books about computing Category:J. W. Henderson and Company books Category:Books by Eric Evans
$$\delta \leq \frac{C_M}{2\rho} \delta + \frac{1}{C_K} \left(\frac{C_M}{2\rho} - 1 \right) \delta^2$$

We see from this that $\delta \leq \frac{C_M}{2\rho} \delta + \frac{1}{C_K} \left(\frac{C_M}{2\rho} - 1 \right) \delta^2$ and thus $\delta \leq \frac{C_M}{2\rho} \delta + \frac{\delta^2}{2\rho^2} \left(\frac{C_M}{2\rho} - 1 \right) \delta_0$.
To prove the second assertion of the theorem, it remains to show that $\{u_j\}$ is a Cauchy sequence. Let $w_j := u_j - u_{j'}$ in $W^1_p(\Omega)$, $\|w_j\|_p \leq \delta_0$, where δ_0 is defined by (12). Now, using (12) again, we have $\|w_j\|_p \leq \frac{C_M}{2\rho} \|w_j\|_p^2 + \frac{1}{C_K} \|w_j\|_p^3$. Thus, by Corollary [C.E.
