
KEYMACRO is a breakthrough invention that will increase productivity and remove tedious work by performing macros and other tasks automatically. It also creates an index for existing information so that it can be searched easily. KEYMACRO can be combined with various software (such as Microsoft Word, Excel, etc.), so that users will be able to save a lot of time with only one click. Furthermore, the use of macros will also make it possible for anyone to add to the software as necessary. Convertible Portable Speaker: 1) Foldable Portable Speakers: Big and powerful, the folding loudspeakers can be carried with ease and taken anywhere. The speaker is foldable and will never take up too much space. The different folding method can be fully customized. The built-in battery is rechargeable by USB. 2) Expandable Speaker: The built-in battery is rechargeable by USB.3) Adjustable Speaker: Different colors available, adjustable stand, with folding metal frame, portable and easy to carry. 4) Compatible with MP3 players: The speakers are compatible with most MP3 players (such as iPod, MP3/MP4 player, iPhone, PDA etc.) to play MP3 files. The speaker is convenient to use, foldable, lightweight, practical and portable. •Compact size - The built-in speaker is only 4cm/1.6" and can be easily stored and carried. •Adjustable volume: use the volume button on the screen to adjust the volume. •Lightweight and foldable: the speaker is lightweight and folds easily for easy storage. •Convenient to use: different folding method available, easy to use, convenient to carry. •Compatible with most MP3 players: the speakers are compatible with most MP3 players (such as iPod, MP3/MP4 player, iPhone, PDA etc.). •6.5 hours constant music play. •4 hours constant music play. APP Box Description: APP Box Description: APP Box is an innovative remote control app, which can be used to control various functions on most high-end smart home devices. APP Box is specially designed for all types of remote controls (IR-RF, IR, RF, RS232), and it is able to automatically connect to the devices to be controlled. This unit is designed to provide the student with an understanding of the ethical issues that arise when teaching and learning in a digital environment. This unit will explore the concept of 'digital literacy', outlining its importance to social interaction, communication and understanding. The unit will explore the concept of plagiarism, identifying the types of plagiarism that take place, and explaining plagiarism's impact on a person's reputation, social relationships, and online reputation. The course will explore how to identify and mitigate plagiarism, and identify an ethical line in the use of online resources. Students will be able to understand the ethical line in the use of online resources, and be able to differentiate between plagiarism and theft, and suggest appropriate strategies to address both. This unit will explore the ethical issues of privacy, intellectual property and student and workplace safety in a digital environment. The unit will investigate the ethical issues surrounding privacy, including the collection, storage, use and sharing of personal information. Students will investigate various theories regarding privacy, and develop their own views on privacy. The course will also investigate intellectual property, including the creation, dissemination, and ownership of intellectual property. Students will investigate the ethical issues of ownership and dissemination of intellectual property, and identify strategies for dealing with intellectual property violations. Students will also consider how digital technologies can be used to support workplace safety, including both physical and mental safety. Students will be able to identify various types of physical risks in the workplace, including workplace hazards, and consider how the use of technology can help to identify and address such risks. Students will explore various theories and strategies regarding workplace safety, and develop their own views on workplace safety in the digital environment. Students will also identify and assess the ethical issues arising from the use of personal digital devices and technologies in the workplace, including for reading, writing, speaking, listening, studying, research, play, learning, work, leisure and doing business. This unit will explore the ethical issues of personal body care, and the implications of our health care and medical decisions on our personal lives. The course will explore the concept of informed consent, including the information we are provided with when we are making decisions about our own health care, and the impact of that information. Students will investigate the ethical issues of informed consent, and be able to discuss how informed consent is interpreted and applied in medical contexts. Students will also explore the ethical issues of assisted dying, including the possible consequences of assisted dying, and the impact on the family and loved ones of the person requesting
