

Get rid of Desktop clutter and make your desktop usable. EmptyDesk puts a dark and black cover on your desktop to make it hard to see what's there. When you remove the cover, you'll see all the files, directories and icons back as before. EmptyDesk is a quick and easy way to hide a folder from being seen by others. There are two main features of EmptyDesk: - Remove the black cover from the desktop. - Restore the hidden folder and all of its content. **IMPORTANT - IT DOESNT WORK ON OTHER DEVICES OR EVEN THE SAME DEVICES** It works on Mac, but is not cross-platform (meaning it won't work on Windows or Linux). We do not offer refunds on software purchases. The amount of the refund is the cost of the app itself.
