, and try the internet adrian_1908, try the forums, or even askubuntu for an answer I installed ubuntu and now i'm trying to install vbox transip, how does that ubuntu-server, relate to ubuntu? bazhang: I just asked. I was told to try it in the terminal, not the GUI, but if it works on the CD I can always switch to a terminal but when i run the command "sudo apt-get install virtualbox-5.0" it says OerHeks: i was told it was for that purpose (no support) evildoer, not in the repos "virtualbox-5.0 : Depends: virtualbox-guest-utils (= 5.0.0-10200) but it is not going to be installed Depends: virtualbox-guest-additions-iso (= 5.0.0-10200) but it is not going to be installed" sry my english is bad transip, maybe you should ask that in ##networking? evildoer, no thats just the warning does anyone know if it's possible to write an ISO to a USB stick using Ubuntu, or something like unetbootin? I can't find a guide or how to on the web. OerHeks: i'll do that, thanks!
adrian_1908, sure, adrian_1908, are you sure you want a live iso on a usb stick? adrian_1908: you should be able to mount the iso and then copy it to the usb OerHeks: I'm installing it on an external hard drive that
