I need some simple macro scripting in powershell. I'm using this to run vlc command line. My macro script is as follows. \$playlist = "E:\1.m3u" \$args = @"--playlist-delay=10", "--next", "--next-window-number=10", "--nodrop", "--no-auto-scroll", "--no-hls", "--no-live-seek", "--no-icon", "--full-screen", "--no-preferred-source", "--no-audio", "--no-video", "--enable-network", "--no-video-title", "--no-rtp-port", "--no-vr") \$videoplayer = "E:\videoplayer.exe" \$cmdLine = "C:\Program Files (x86)\VLC\vlc.exe" \$console = "C:\Program Files (x86)\VLC\vlc.exe" + " -console" \$logFile = "C:\Program Files (x86)\VLC\vlc.log" Write-Host "Executing: '\$cmdLine'" \$process = Start-Process -filePath \$cmdLine -ArgumentList \$args -Passthru Write-Host "Process started" Write-Host "Completed: '\$process'" However, it gives an error: VLC media player 2.2.6 Janus Player [...] Set default renderer to VLC [...] Decoding/Encoding failed: No such file or directory I use the parameters which I read in the VLC manual. What can be wrong? A: I found the solution on I have modified the powershell script as follows: \$playlist = "E:\1.m3u" \$args = @"--playlist-delay=10", "--next", "--next-window-number=10", "--nodrop", "--no-auto-scroll", "--no-hls", "--no-live-seek", "--no-icon", "--full-screen", "--no-preferred-source", "--no-audio", " 2d92ce491b
