This is one of a set of keybindings that control the program in a way that is natural and convenient to most users. The functions of these macros can be expanded by right-click. For example, you can define macro for Navigation Panel, Task List, the property window, etc. On the right side of the interface are the standard modules that are pre-defined. For example, if you have a main window, a Property Window, and a Main Panel, you can create a Macro for the whole window. There are many advantages of using this type of software: - Expandable: You can use more than one Macro at a time, and you can expand the functionality by right-click. - Customizable: You can change the functionality of Macro by right-click. - Window-Specific: You can define a Macro for just one window. - Keyboard Shortcuts: The shortcut keys of the interface can be customized. - Multi-user: You can define the keybindings in an easy way and save them for future use. - The program automatically saves the keybindings and the macro files to the program directory. - You can edit the save files. - You can undo changes you made to your saved keybindings. - You can add/edit/delete/copy/paste any file. - The file can be saved in the save directory. - The file can be saved in the default directory. - The program can save files into different directories depending on the current directory or user. - You can copy/paste a file. - You can copy the current directory. - You can move/cut the current directory. - You can open/close the Properties Window. - You can open/close the navigation panel. - You can open/close the task list. - You can open/close the Main Panel. - You can expand/collapse the Search panel. - You can expand/collapse the navigation panel. - You can expand/collapse the task list. - You can expand/collapse the Main Panel. - You can expand/collapse the property window. - You can expand/collapse the help window. - You can expand/collapse the main menu bar. - You can expand/collapse the properties window. - You can expand/collapse the tasks list. - You can expand/collapse the
