What's New in the?

===== The paint will assemble an image into multiple, randomly positioned layers based on a user-selected image. Each layer can have a different color depth as well as position and rotation. Finally, the user can apply a border and/or a title to the completed image. Here you will find 5 example images: 1. A basic mosaic 2. A 3x3 mosaic with a border 3. A 3x3 mosaic with a border and a title 4. A 3x3 mosaic with a border, with a glow effect 5. A 3x3 mosaic with a border, with a title and a glow effect Mosaic Maniac Collage Paint will place a layer on your image to create a mosaic. You can create a mosaic with any image. You can create any combination of layers with any number of different colors per layer. For example, you could place a text layer on top of a photo layer, or you could place a vector image layer on top of a photo layer. You can create a border around each layer of your mosaic. You can also apply a glow effect to your layers. By default, the paint will assemble the layers, rotate them, place them on the canvas, and apply a border. Finally, you can also add a title and apply an image filter to the photo layers. - Press "C" to create a new layer - Place the cursor over any empty spot on the canvas - Click the color well to select a color - Right mouse click on any empty spot to place the cursor there - Click the new layer icon in the toolbar to add it to the canvas - Double click on any empty spot on the canvas to place the cursor there - Click the color well to select a color - Right mouse click on any empty spot to place the cursor there - Click the new layer icon in the toolbar to add it to the canvas - Click the rotation icon in the toolbar to rotate the layer - Apply border, title, and image filter as desired The completed image will be automatically saved to the current working directory. You can choose to save the image as a PNG, JPG, GIF, or TIF format. Installation: ===== 1. Copy the Mosaic Maniac Collage Paint plug-in into the Paint.NET plug-ins directory. This directory is usually C:\Program Files\P
