The DownloadCenter automatically scans MacUpdate.com and displays the available applications in the order that they are added to your cart. New software is added weekly; your cart will be updated to reflect the new applications. For new Mac applications, Updates are not automatic, but we have made it easy to find the updates. Just click the "Check for Updates" link on the software page of the Mac App Store, or simply run the software, and the Updates will appear under the "Software Updates" heading. If you would like to view all the updates for an application, you can view the "Details" for the software. Developed for professionals, Darkroom is a multi-track video editor, color corrector and converter with a powerful, intuitive interface that enables you to make creative editing decisions with just a few clicks. It's a small application, but big on power. With support for ProRes, XDCAM and RED formats, Darkroom can capture, edit and record on the spot. Its core functionality includes ProRes 4K editing, 4K file-based recording, multi-track color correction, and the ability to save projects in XML format that can be opened in other applications like Final Cut Pro. Darkroom is very efficient, thanks to its real-time preview and video thumbnails with all the controls you need. It's super easy to batch convert, crop, speed up, and stabilize video, and the new AudioMixer module enables you to process audio in real time while working on video. The powerful toolset also includes high-level color correction tools, iZones and transitions, instant hotspots and smart masks. The Dashboard offers effective workflow and file organization, and provides on-the-fly statistics on your work. Darkroom is a well-rounded video editor for professionals that, at its core, is capable of taking high quality, multi-track, professional-grade HD video, and then easily converting and editing it to get the best results for your projects. Available in both 32- and 64-bit versions, Darkroom will work in both
