### A.C. Calculator Crack+ Free Download [Win/Mac] (April-2022)

- The function of A.C. Calculator is based on a detailed mathematic model of the aircraft wing performed by RL Consulting (- It is available for any aerodynamic model of aircraft or airship - The tool is included in the CC2013 manual - It can be used for any airplane, helicopter and ship model - The basic A.C. Calculator option and the classic Aerodynamic Calculation option are included. - A.C. Calculator can calculate the A.C. location only, or the moment of inertia and center of gravity - You can get the A.C. tool from Add-Ons program - The tool is available in English, French, Spanish, Russian - With A.C. Calculator the wing is divided into sectors based on the concept of spar to wing tip distance ratio and the structure is divided into panels based on structure to wing tip distance ratio. Sector and panel are placed on a circumference (entire ring of points on which the circle based on the A.C. center circle touches the wing) - The chord line is perpendicular to the trailing edge of the panel and to the sector it belongs to. Each sector is located based on the location of its corresponding panel. - Sector is located based on the distance between the leading edge of the panel and the center of the circle based on the A.C. center - Panels are located based on the distance between the outer surface of the panel and the curve based on the plane of the wing: the center of the plane of the wing is placed at the chord line. - The tool is written in Java. The Java development environment and all graphical components are made by RL Consulting. A.C. Calculator Features: - Automatic calculation of the A.C. location. - Save the location of the A.C. in the clipboard, so that you can copy the information to other applications. - Load the location of the A.C. from the clipboard. - If the A.C. location is not saved in the clipboard, the tool will automatically calculate the A.C. location based on the parameters defined below. - If the location is not saved, the tool can also load the location from the clipboard. - If the location is saved in the clipboard, it will be placed in the window at the location which is defined in the clipboard. - You can select the following parameters for loading
