## CubeTwister Free

CubeTwister is an app that helps you solve the Rubik's Cube. It has been designed to solve the entire Rubik's Cube as fast and as easily as possible. It is aimed at people who are new to the Rubik's Cube. It is simple, intuitive, and easy to use. CubeTwister will solve the Rubik's Cube in record time for you. CubeTwister is a package of 3 apps. You will need to download and install all 3 apps if you wish to use CubeTwister. Apps include: CubeTwister: Solves the cube and keeps track of the solved/unsolved grid. You can take a photograph of your solved/unsolved cube to save the position of each piece. CubeDifficulty: Changes the difficulty of the puzzle. Low, Medium and High modes are included. High is the hardest difficulty. Cubetype: Reads the type of cube you are using, shows the difficulty and stores a statistic about your most recent solves. CubeDesc: Gives you detailed information about your cube, including the date you bought it, the manufacturer, the size, number of pieces, and the number of sides. It also describes the board colour, the stickers colour, and the colour of the clear stickers. If you are a beginner and have never solved a Rubik's Cube, CubeTwister will take you from puzzly to solver in record time. If you are a speed-cuber and have already solved many Rubik's Cubes, CubeTwister will test your skills by offering up increasingly difficult puzzles. If you are a seasoned speed-cuber, you will find CubeTwister challenging and satisfying to use. CubeTwister Tips: If you are new to the Rubik's Cube, start with a low-level difficulty puzzle. This will help you learn the rules of the puzzle, and also get you the most out of CubeTwister. As you solve more and more puzzles, you will build your cube solving skills, so you can solve cubes in a number of different ways. CubeTwister will enable you to solve your cube in the way that you want. If you are a speed-cuber, you can do things such as manually solve the cube to verify the number of permutations in a solve, and to see how your solve compares to the fastest times on the web. If you want to do this, you will need to press the record button at the bottom of the

## What's New In CubeTwister?

CubeTwister is a free Windows and Mac OS X application that makes it easy to solve a Rubik's Cube. It can rotate a puzzle piece into an orientation that is suitable to be solved by the method that you prefer (e.g. by locking the piece in a certain way or making it invisible). This is a feature that has not been available on any earlier cube solvers. CubeTwister is written in Java. No programming skills are required to use the application, but a basic knowledge of the algorithms for solving a Rubik's Cube is useful. CubeTwister uses an algorithm that is based on the best established solvers in the world. It is possible to make a small change to the algorithm, and the app will update to use the new algorithm. By default, the algorithm is completely experimental. CubeTwister is designed to make the most of a computer's capacity. It will rotate cubes in a square that fits on a screen, and it may be very fast (but it will always be very accurate). When the cube is solved, it can be saved as a picture. The orientation of the solved cube can be easily selected. Features: Multiple solutions CubeTwister can solve the largest, most scrambled cubes without help. It can handle all of the features that are in standard Rubik's Cube solvers, as well as other features that are not implemented in other solvers. These features include the Arbibian method, invisible edges, scrambled cube features, etc. References CubeTwister uses the best-established algorithms in the world. What's new in version 1.0.5? - Fix for a possible memory leak. - Improved handling of a limited disk space. - Scrambled cubes, more solved cubes, different cube parts... Versions 1.0.4 and 1.0.5: - Fix for file-locked bugs in 1.0.4. Versions 1.0.3 and 1.0.4: - Corrected reference to the "Color Cube" puzzle, which is not in fact a Rubik's Cube. Versions 1.0.2, 1.0.3 and 1.0.4: - Fixed bugs that could cause CubeTwister to crash. Versions 1.0.1 and 1.0.2: - The application can now play a silent video on the desktop as a visual aid. Versions 1.0.0 and 1.0.1: - First version of CubeTwister. - CubeTwister now uses the Java API to perform Rubik's Cube solving. Versions 0.9.3 and 0.9.4: - Use a clearer update window. - The new update system for CubeTwister. You can update all CubeTwister files by downloading and running "
