

What is Portable CE Clock? Portable CE Clock is a small software application whose purpose is to help you check out the current time, set up alarms, and work with a stopwatch. Benefits brought by portable utilities You can keep Portable CE Clock stored on pen drives or other portable devices in order to have it with you all the time. Gaining access to its GUI requires only a double-click on the executable file because you do not have to go through preset steps embedded in an installation process. Additionally, you may run it without administrative privileges. It does not write entries to your Windows registry and leave other traces behind. It actually saves all configuration settings on the storage device. You can uninstall it via a deletion task. You may run the tool directly from the pen drive on the target system. Simplistic looks Portable CE Clock reveals a minimalistic layout that allows you to set up the dedicated parameters with ease. Although a help manual is not available, you can venture into decoding the program's functions on your own because they look very easy to work with. You cannot resize the main window of the app. The time data, which is displayed in the main window, cannot be scaled. The background of the GUI is transparent and you may move the primary panel to the desired desktop position. How it works Portable CE Clock reveals the current time in hours, minutes, and seconds directly in the main window. In addition, it shows the current date. The application gives you the possibility to set up two alarms by specifying the time in hours, minutes, and seconds. When the time is up, the tool plays a preset audio notification. The stopwatch is very basic. You are offered the freedom to pause or reset the stopwatch using simple clicks. On the downside, you cannot work with a countdown timer, set alarms with user-defined audio notifications by importing files from your computer (e.g. MP3, WAV, MID, OGG), run custom programs when the time is up, and customize the colors used for displaying the time and stopwatch. Tests have shown that Portable CE Clock carries out a task quickly. It does not eat up a lot of CPU and memory resources so the overall performance of the computer is not affected. Final observations All in all, Portable CE Clock comes packed with basic features for helping you time various activities and configure alarms, and is suitable especially for rookies. What's New In?

Utilities from the MakeMeTools team offer you a handy utility called Portable CE Clock that helps you time various activities and configure your computer's clock. If you are among those people who like to share files on Facebook, then Portable CE Clock is the ideal utility that you need. It is a simple and easy-to-use program that supports creating a button that lets you send files on a permanent basis from your computer to your Facebook profile. What you can do with Portable CE Clock? With this software, you can save files that have a.cpl extension on your computer and upload them to your Facebook profile by clicking a dedicated button. The process is quick and easy, as it does not require any technical skills. Benefits brought by Portable CE Clock You do not have to download and install a separate program to share files on Facebook. It is a very easy-to-use tool that lets you send files in a single click. Although you can use this tool with any sort of browser, the list of supported browsers is limited to Google Chrome, Mozilla Firefox, Internet Explorer, and Opera. You may decide to select files that have a.cpl extension. The list of supported file types includes *.doc, *.docx, *.ppt, *.pptx, *.xls, *.xlsx, *.txt, *.mp3, *.mp4, *.avi, and *.mpg. You may share videos, music, and other files. You are able to select the target profile or the list of people to whom you want to share files. You can leave the default option or select your profile with the help of your email address. The software is extremely simple to use and the settings are stored permanently on your profile. Portable CE Clock lets you configure how often you want to send files to your Facebook profile. You are allowed to set a schedule of uploading files by defining the time of day that is suitable for you. You can also set up the time at which you want to start sharing files. If you are among those people who use Windows PC, then this program is perfect for you. The process of creating a button that will share files on Facebook is very simple. You can download it from the official website. Advantages and disadvantages The main advantage of Portable CE Clock is that it allows you to upload files to Facebook without requiring you to download and install another software. However, you cannot decide whether to share files with all the users or with a specific group of people. The default option limits you to sharing files with only one user. You may say that Portable CE Clock is a simple utility that helps you perform a few simple tasks. However, it actually has a lot of functions. It can help you share files on Facebook and even adds a separate button for that. What you can do with Portable CE Clock? With this software,

System Requirements:

Operating System: Mac OS X 10.6.8 or later Windows XP or later Linux 64-bit x86 Windows 7 or later with DirectX 12 DirectX 12 available on Windows Vista and Windows Server 2008 Application features: Supported Metal 1.x and 2.0 APIs GPU: GeForce 650 Ti or higher VRAM: 1GB (VRAM minimum). VRAM recommended. Radeon R9 290
