## Web Shooter Free [2022-Latest]

Web Shooter is a handy and reliable utility designed to capture screenshots of websites to JPEG, PNG and BMP format. Web Shooter can be launched from the command line with the following parameters: [website address] [resolution] [picture name]. Contents Web Shooter can be launched from the command line with the following parameters: [website address] [resolution] [picture name]. At the moment there are two versions of Web Shooter available. One of these is a standalone application, and the other is a multi-platform application using a custom installer. You can choose the one that best suits your needs. The standalone version of Web Shooter can be used to quickly capture screenshots of websites. All the parameters required to launch the standalone version of Web Shooter are listed above. The standalone version of Web Shooter was written with Mac and Linux users in mind. The multi-platform version of Web Shooter was written to provide a fast and reliable way to capture screenshots of websites on Windows and Mac. The multi-platform version of Web Shooter was released with the following parameters: [website address] [resolution] [picture name]. As with the standalone version of Web Shooter, all of the parameters required to launch the multi-platform version of Web Shooter are listed above. How to use Web Shooter The standalone version of Web Shooter is a simple app. You can quickly and reliably capture a screenshot of a website. The standalone version of Web Shooter is designed to be used from the command line. The multi-platform version of Web Shooter is a much more powerful app. This is because it includes additional features such as: Ability to capture screenshots of multiple websites Ability to capture screenshots of websites in full screen mode Ability to save images to disk with EXIF/IPTC metadata Ability to save images to disk with OpenEXR metadata Ability to save images in PNG format Ability to save images in JPG format Ability to save images in BMP format Ability to save images in TIFF format Ability to save images in PDF format Ability to save images as .jpg, .png or .bmp files Ability to save images as .pdf files Ability to save images as .tif, .tga, .exr and .icns files Ability to save images as .gif files See also Web Screenshot Screenshot External links Download link for
