"Given the history of the site, and what is at stake, a project on that site is not in the interests of the community," City Council Speaker Christine Quinn said at a news conference in Manhattan. "Frankly, it's not appropriate to put it there," she added. The council approved a new site for the building on Oct. 30, after complaints by local residents about the original plan. New York Mayor Bill de Blasio had originally approved the plan. According to the New York Post, the prayer space for worshippers would be located at a corner in the Hudson Park Apartments, a residence that had been bought by the Faisal Mosque, an Islamic center in nearby Upper Manhattan. "This is a project that is about seeking understanding and peace, not division and animosity," said a local resident, who took to the microphone at the news conference to criticize the plans. "I ask my fellow New Yorkers to join me in this call for a new site for the Faisal Mosque, one that would be more fitting and more appropriate to the surrounding community," he added. The proposal is one of many mosque-building controversies in the United States in recent years. A few days before the Sept. 11 attacks, the Islamic Center of Passaic County, NJ, which is next door to the site where American Airlines Flight 11 took off from Newark Liberty International Airport, started work on a project for its building, which was to house a mosque and community center. The center would reportedly have a prayer space, classrooms and a library for the Muslims of Passaic County. In November, a U.S. Court of Appeals in 5b5f913d15
