Find subtitles in movies or TV shows. Easy to use. Interacts directly with IMDB.com. Locate subtitles on the internet with the IMDB browser. Installs quickly and easily. Find latest trailers from popular movie websites. Find subtitles for free download or viewing online. [...] Hoverboard Search is an easy to use tool especially designed to help you look for video games titles online and download them on your computer. The application is easy to install and thanks to its comprehensive interface, it's even easier to use. To get the games, you need to enter the game's name, choose the provider, language and then click the 'Search' button. The results are then displayed along with details about the game such as year, genre and rating. With a double click on the search results, the files are automatically downloaded to the target folder you set right after the application is installed. All you have to do then, is take the subs file and insert it into the player. Subtitle Search also comes with a really good feature that allows you to locate games on the popular IMDB website. To look one up, just like when searching for a subtitle, all that is required is the name of the game. The application then displays the plot, links that are relevant to the game, images and cast information. In case the IMDB browser doesn't deliver the results you want or are in need of more information, Subtitle Search enables you to browse the Internet. This means that you can look for a subtitle even if the application can't locate it for you. Moreover, Subtitle Search also delivers a feature that allows you to locate trailers as well, making the application seem like an all-in-one movie tool that does everything except download the actual movie. In closing, Subtitle Search looks like a very practical and handy tool to have around, but under the hood it seems to be struggling and is in need of attention because it tends to crash a lot, sometimes right after initiating a new search. Tribal Paint Search 2.0 is an easy to use tool especially designed to help you look for photo sets online and download them on your computer. The application is easy to install and thanks to its comprehensive interface, it's even easier to use. To get the photo sets, you need to enter the photo set's name, choose the provider, language and then click the 'Search
