KEYMACRO allows the user to enter a selection of files and folders by use of a keystroke

macro, which can then be executed automatically in a number of different ways.

ENTRYCODE Description:

This component allows for the user to enter a file and folder name and macro keyword.

MACROKEYNAME

Description: This component is used to create a keystroke macro and is referenced by the keystroke macro. After you have entered a file and folder name and macro keyword using

the Entries and Keys components, you then need to select a macro name from the dropdown box. Select a macro from the list and press the create button to create a macro.

MACROKEY Description: This macro is used to run the selected macro. **UPLOADER**: Uploader allows you to save all the files selected from the drop down box to your hard disk. It is very easy to use with a simple interface. **FEEDBACK**: The

feedback component allows you to select which feedback should be provided. The feedback component includes several different methods including text feedback, sound feedback, LED feedback, a drop down list and a radio button. **SUBMIT TO:** Submit to lets you select the destination you would like to send the selected files to. You can send files to FTP, EXE, ZIP, MPEG, JPEG or RAR, and you can also save the list of files

and the save button to a text file.

SUBMIT FILES: This

component allows the user to select the files that they wish to submit to the selected FTP site.

You can select all files or files from a folder. You can also select files for FTP only or ZIP only, so that all other types of files will be ignored. **EXE**

COPY: EXE copy allows you to copy all selected files to a specified EXE file. In addition to the basic options there are

other options available. These include: - only direct files - only directory files - only hidden files - all files - the file extensions. **FTP COPY:** This component allows the user to select the FTP site and the directory. The user will then have the option to choose the file to copy to the FTP site. You can also select all the files in a folder by clicking on the folder icon. The files in the folder will then be added to the FTP site.

FTP FILES: This component
allows 1d6a3396d6

-You can download any number of files and folders at a time.
