Spearian For Excel

KeyMacro Pro for Excel is a macro builder, which provides you with the ability to convert a blank piece of paper into your own or client's data processor. And when you convert it into a personal machine, the macro will do all the calculation to give you the desired results. KeyMacro works with text files (Excel or other programs), which are read into your personal processor. The user's selected parameters are used to make the calculation, which generates a template on which the desired calculations are placed and the results are presented. After you finish writing the data processing software, the results can be saved in a new file, which is sent back to the original source. Macros are "data processors", which allow you to perform a series of complex calculation in a given template without opening a new document. KeyMacro Pro for Excel offers great customization options, which include editing functions, such as updating, deleting, inserting, etc. KeyMacro Macro for Excel allows you to run the calculation on any data with the support of the StandardForm. KeyMacro Macro for Excel allows you to run the calculation on any data with the support of the StandardForm. Other Features: - macro builder - in-built calculation editor - supports Microsoft Excel 97/2000/XP/2003 - supports macros - template technology KeyMacro Plug-In Description: KeyMacro Plug-In for Excel is a macro builder that allows you to convert a blank piece of paper into your own or client's data processor.
