Video4YouTube Free

KeyMacro is the most comprehensive interface between professional video and script editors. It has tools and control to easily manage all formats of media (Audio, Video, Image, and Text). Synchronization with Premiere Pro 4.5: Synchronize your timeline with the current project directly from external media playback applications like media players, DVD players, TVs, and online media services like YouTube. Adobe After Effects Export: Export timeline sequences to popular video formats from Adobe After Effects. All features available in After Effects are available in the timeline editor. Pixellight Pro Export: Pixellight Pro supports the export of sequence windows to all popular video formats (AVI, MOV, WMV, etc) including the ability to compress the file to the frame size you want. Additional Actions: Manage your iMovie projects and quickly create new ones. You will have a complete library of your projects in your iMovie application, and they will be updated in Vegas Pro. Plan, Design, Prepare, and Execute Your Project: Our projects now plan, design, prepare, and execute your project. You will be able to create and manage your project in iMovie, and all Vegas Pro actions will be synced to the project timeline. Vegas Pro will control the project's render settings and will be able to render with a variety of preset options, and have them automatically synced back to iMovie. Not just for Premiere: Pixellight Pro is also integrated with Windows Movie Maker and XVIDEOS. It is part of the video service, so you can also use it to export video from online sites like YouTube and Facebook. Screens, Photos, and Text: Now all the tools are used to create screens, photos, and text. Add more to your movie using text, photo, or video stills. Accelerated Media Encoding: Adjust video and audio format settings in a variety of presets for better performance. Editing Tools: Each action within the media library can be easily moved, scaled, and rotated using a variety of methods. Timeline Syncing: Synchronize video sequences in your project with the timeline. By assigning key frames and frames within the sequence, you can control how your project plays back. Support for Final Cut Pro X, Premiere Pro 4.5, After Effects 4.5, and DVD Authoring Pro 4.5: Use in Final Cut Pro X, Premiere Pro 4 80eaf3aba8
