System Requirements:

The game uses the Unity 5 engine which is currently in its early stages. We would like to stress that we have not made any optimizations for the Unity 5 engine yet. The current game is using the standard Unity 5 engine which is available from Unity website and using the default settings. We recommend users to have atleast DirectX 11 or OpenGL 3.3 compatible GPU with 512mb VRAM minimum to play the game smoothly. The game will run perfectly on 4GB Ram and Intel i5/i7 processors. However, we are not sure how the game
