Add quickly your favorite snippets with KEYMACRO. Choose your snippets and press the "Add KEYMACRO" button. After that KEYMACRO will start for the creation of the signature for your snippets. Once finished, you will be able to use the Snippet Manager to organize your snippets in groups. KEYMACRO does not support folding (copying all the snippets in one selected snippet), unfortunately. It also doesn't support text editors like Notepad. It works with editors that have TextFX enabled, like UltraEdit (the demo version of UltraEdit has all features available, so you can try it before buying). If you want to try before you buy, you can download the demo version of UltraEdit. If you want to read more about UltraEdit you can read this: This program uses the Macros Manager API to get all the snippets. It does not require Microsoft.NET Framework. UltraEdit developers: Please, follow me: From a few days, we have the problem that KEYMACRO's Snippet Manager can't show the snippets grouped in folders. We've tried to force the signatures to be created, but the problem still remains. We've also had the problem that the signatures from UltraEdit always differ from the ones from the demo version. Thanks for any help. NOTICE: The license allows us to use it for both private and commercial use. IMPORTANT: You are allowed to use the "QuickClip" in any form of your PC. You are not allowed to sell it or to give it away. Lanly Clipper is an implementation of the popular Open Office Clipboard utility in C#. It's a standalone application which allows you to use the Clipboard in Windows without Open Office. Key features: Clipboard Manager: Allows you to group the clipboard snippets. Create your own hierarchy of folders and get all the snippets by a single mouse click. Allows you to load different data depending on the category. Snippet List: Allows you to edit the existing snippets. You can edit the file, the descriptions and the category. All your changes will be saved in the file, so that you can re-edit your snippets whenever you want. File Log: Allows you to save all the actions performed on the application in a file which 77a5ca646e

This software is a video converter that allows you to copy and play videos from any Windows computer or DVD/BluRay/VCD drive. It can also handle subtitles. It has a built in converter for various file formats and you can add external converters using its multimedia library. The software has the ability to work with all audio formats, and support the following video formats: AVI MPEG-1/2 MPEG-4 VOB AVC/VC-1 WTV MP4 MKV M2TS OGG WMA AAC AC3 DTS LPCM MP3 FLAC Canopus 2 GSM PAL MS MPEG-4 Audio There are many more formats in the multimedia library. If you like the look of the software and it can play your video format or add-on converter, please give us a rating and maybe suggest improvements. One big advantage is that the converter can handle all audio/video formats without installing the Windows Media Player! More info This software is designed to be a multithreaded converter. It can convert videos, audio and subtitles in an easy-to-use graphical interface. You can preview the result and convert the full video with one click. Its design allows you to: - Convert multiple videos at the same time (up to 100) - Add two formats of video (AVI, MPG) simultaneously - Convert subtitles into other formats - Play all videos as well as audio without the need for other media players - Play media, convert and display in the same program - Play and convert files using the multimedia library This software has a very intuitive GUI that requires little explanation to use. All you have to do is to add a file or folder to your conversion queue and click the Convert button to start the conversion. The conversion process is very fast: the conversion of a 3-minute video takes around 30 seconds. An online help file can be accessed in the same interface. There is also an option to create a DVD-Video ISO image file. Besides converting videos, you can extract files from the ISO image file. This is useful when you want to create your own menu for
