Just recently the dvd came out and I had to buy it in dvd format, but I didn't figure out how to get it working with my computer. In the end I couldn't use the dvd. I used it one time and it did boot up and work but I can't do anything with it. I'm in school at the moment so my computer is not available. If anyone could help with getting the dvd to work I would really appreciate it. I also downloaded the dvd player for mac, but I can't seem to use it. It says "The input device could not be opened for playback. Please check if the.exe has been downloaded properly" (Windows 7 64-bit). I am new to this and don't know a lot about computers. Thank you in advance for any advice that you may have. Daphne will give you a private tour of the spa and its amenities, including a sauna, plunge spa, massage, and more; and Daphne also likes to get up close to see the action. And let's not forget our two hotties, Eve and Annie. Pounding both of them as they scream and moan is sure to heat up your thoughts.
