ACIS (Additive Construction Information System) is the cross-platform drawing and data exchange standard that was developed by Alias/Wavefront (now Autodesk) starting in 1995. ACIS is the de facto standard for exchanging digital 3D designs. ACIS is still in wide use for digital model exchange on a local

network. ACIS versions can be viewed using ACIS Viewer or using a C++ class library, ACIS Class Library. Properties and data (such as dimensions) can be viewed using the Properties palette window.

Austin Police Chief Art Acevedo on Wednesday offered an apology to a Houston crowd for a controversial June 17 “Saturday Night Live” skit about President Trump and hurricane Harvey, an offer that drew cheers and jeers from the audience. Acevedo made his comments at the International Peace and Freedom Festival in the Texas capital. The event is organized by the nonprofit Peace and Freedom Party, which featured Trump in its 2016 ticket. The controversy stemmed from a “SNL” skit in which Amy Schumer

portrays White House chief strategist Steve Bannon and ridicules Trump's immigration policy, while the president speaks from the Oval Office. Bannon is seen in the video with a yellow rain slicker, saying: "We're going to war in the streets." At the end, Schumer delivers a line in which she replies, "You're fired!" to Trump, who then tells the camera: "The show must go on!" The skit ends with Schumer crawling out of a window and Trump tossing her off a bridge into a river. "Just an hour and half ago I got an email from Mr. Trump saying: 'I love that skit. It was

hysterical. Please let me know,”
Acevedo said. “You don’t turn your
back on your commander in chief.”

Acevedo, an avowed Democrat,
