S:DB.Class.xkey("): S:DB.Class. 77a5ca646e

FlexPaper SDK is a powerful and high performance FlexPaper builder for Adobe AIR applications. The SDK includes:

- **FlexPaperBuilder:** An Adobe AIR based FlexPaper editor. It supports flexPaperPro, flexPaperCommunity and flexPaperCommunityPro.
- **SwfLoader:** A swf file loader for FlexPaperBuilder. It can load swf files using their url or any content specified in swf parameters.
- **FlexPaper Assets Browser:** The assets browser for FlexPaper builder. The assets browser include a nice tree based asset overview with drag and drop feature.
- **FlexPaper Tasks & Charts:** The tasks and charts data sets, templates and widget components for FlexPaperBuilder.
- **FlexPaper Tasks:** The tasks (events) editor for FlexPaper builder.
- **FlexPaper Tasks:** The tasks (events) editor for FlexPaperBuilder.
- **FlexPaper Community Pro Tasks & Charts:** The tasks and charts data sets, templates and widget components for FlexPaperCommunityPro.
- **FlexPaper Community**

---

Tasks: The tasks (events) editor for FlexPaper builder. • FlexPaper Community Tasks: The tasks (events) editor for FlexPaperBuilder. • FlexPaper Community Pro Assets Browser: The assets browser for FlexPaper builder. It includes a nice tree based asset overview with drag and drop feature. • FlexPaper Community Pro Assets Browser: The assets browser for FlexPaper builder. It includes a nice tree based asset overview with drag and drop feature. • FlexPaper Community Assets Browser: The assets browser for FlexPaper builder. It includes a nice tree based asset overview with drag and drop feature. ]]> Sat, 07 Jun 2011 18:06:04 -0400FlexPaper, 3D, Builder, Flash, Flash Builder, Flex3D, Flex Builder and more... FlashPaper Builder lets you create Flex applications in 3D. It is based on the code behind the FlexPaper FlashPaper Community Pro and FlexPaper FlashPaper Community editions. The project contains FlexPaper builder and also provides you with a flexible way to deliver your application. With FlashPaperBuilder you can build Flex applications in Flash, like:  
Applications for TV Standalone applications Games

---

Mobile Custom controls and more. FlashPaper  
Builder : • Adobe Air based FlexPaper builder. •  
Compatible with FlexPaper Community Pro and  
FlexPaper Community

#### What's New In?

This application serves to develop and distribute your own version of FlexPaper without contacting Adobe. How to install: Open your AIR project in FlexPaper SDK. Your AIR project is set up in default IDE. Select File->Project Settings->Properties. Click on the "FlexPaper SDK" tab. A window that contains information about FlexPaper SDK will appear. Click on the blue "Install FlexPaper SDK" button to complete the installation. Uncheck the "Apply settings" button when your set up is finished. Your project is set up with FlexPaper SDK. Close the FlexPaper SDK properties window. How to use: Please have a look at the example applications included with the software. This invention relates to an automatic transmission for use in a motor vehicle. A typical conventional automatic transmission

---

comprises a forward and reverse gear mechanism, a speed-change gear mechanism, and a locking mechanism. When the forward and reverse gear mechanism is selected, the speed-change gear mechanism automatically changes the speed of a driving wheel of the motor vehicle. When the speed-change gear mechanism is not used, the locking mechanism locks the driving wheel. The forward and reverse gear mechanism, the speed-change gear mechanism and the locking mechanism are arranged such that, when they are actuated, they act in one direction so as to select and change the speed of the driving wheel, or act in the opposite direction so as to lock the driving wheel. When a motor vehicle is equipped with an automatic transmission of the above-described construction, the motor vehicle cannot run unless the speed-change gear mechanism is used. Therefore, it is necessary for the operator to select the speed-change gear mechanism, and to actuate it when the forward and reverse gear mechanism is not used. It is, therefore, an object of the present invention to provide an automatic transmission which can automatically select the

---

speed-change gear mechanism, to obtain the effect of the speed-change gear mechanism, even when the forward and reverse gear mechanism is not used.

Q: Javascript - If elements are present inside iframe click on button inside it I want to click on a button present inside a iframe (iframe and parent have same html). I cannot use `$("#foo").contents().find(".btnClass");` to find the button, I need to click on the button using some javascript code. I cannot change anything inside the iframe. A: Give the Iframe an id as well. Then use `$("#myIframe").contents().find("#myBtn");` to locate

---

## System Requirements For FlexPaper SDK:

Recommended: Minimum: Mac OS X 10.4 or later with support for OpenGL 2.0 and Windows 7, Vista, XP, 2000, 2000 Pro, ME, NT, or 95 with support for OpenGL 2.0 Graphics: DirectX 10 or higher, OpenGL 2.0 or higher, or both. Windows 7, Vista, XP, 2000, 2000 Pro, ME, NT, or 95 with support for DirectX 9 or OpenGL 2.0 Game May Run In Background:
