I am new to this forum and I am happy to find such a lively community. AACad 2018 is my first attempt to get into the Autocad business. I've tried AutoCAD LT for quite a while and really liked it. Then AutoCAD 2011 came out, and I started using it for a while, until the real AutoCAD 2012 came out, and I left it for good. Now, it's my turn to jump back to AutoCAD, and with AACad 2018, I hope I can do just that. The plan is to learn Autocad through the methods I find on this forum and also through other resources, until I feel ready to start working on real AutoCAD stuff. Right now, I am just trying to get the feel of Autocad 2018. So I am doing several trials, as you can see in my first post. Your help would be greatly appreciated. Please comment on how to make the most out of AACad and what functions I should spend time on. This is not a new thread, but it seems to be inactive. I am trying to use AACad with existing models that are open and named in AutoCAD. I have successfully created a new project with a drawing named 'ACD'. It is a basic drawing with the following settings: Language - English Save As - Use last project name Scale - 1:1 Active - No Viewer - Drawings and Documents Default Units - None There is a problem with opening existing drawings, though. When I double-click to open, the file name is shown as (project
