With HDR Efex Pro you can tweak up to 36 images in Adobe Lightroom to get the perfect result. First, you must shoot a series of bracketed exposures, capturing the image for different exposures. Then, you must open the brackets in Lightroom and process them to the HDR image in one go, through the one-click presets available. The HDR effects include adjustment of luminance, color and tone. The technique is best suited for capturing natural objects like architecture and landscapes. If you do not have an HDR capable camera, you can still use the app. It can be used to restore and optimize images in basic Lightroom. The app does have an in-built Lightroom module, which does support HDR and it can save the generated HDR images into a folder. + The tool supports your camera-compatible smartphone + You can preview the results immediately + Allows choosing between a default preset or a custom user-setted one + There are six predefined layouts for loading images + Allows the user to adjust the bracket size and type + Allows the user to adjust the direction of the camera movement (vertical or horizontal) + Allows the user to add or remove images from the image stack + Works with landscape and portrait layout + Allows adjusting the look and feel of the image + Allows control of the HDR algorithm + Allows control of gamma exposure + Allows control of detail loss compensation + Allows control of sharpening + Allows control of image output format + Allows control of the tonal range + Allows control of image data compression + Allows control of ghost reduction + Allows control of image alignment + Allows control of the ratio of the scaled HDR image + Allows control of noise reduction + Allows control of the image alignment + Allows control of luminance + Allows control of the tone curve + Allows control of the black level + Allows control of the white level + Allows control of high dynamic range tools + Allows control of the image output format + Allows control of the image content (focus, brightness, exposure and contrast) + Allows control of the settings + Allows control of the image profile (sRGB, linear, Adobe RGB and Wide Gamut) + Allows control of the tint and saturation + Allows control of the shadow color + Allows control of the shadow width + Allows control of the shadow opacity + Allows control of the material color + Allows control of the material tint + Allows
