Tag Archives: low level infections Syndrome: Mild flu-like symptoms, including fever and cold sores. The child may complain of a mild headache, swollen glands, and tiredness. The child may be unwell for about a week, before it eventually resolves. Not asymptomatic if the infection is not severe. The Coxsackie group A virus is the cause of hand, foot, and mouth disease (HFMD), and may also lead to viral myocarditis and life-threatening neurological complications. The virus may also lead to respiratory problems, such as sinusitis. This disease is generally more common in Asia and in children less than five years old. Symptoms: Fever, sore throat, mouth sores, painful mouth ulcers (white lesions), general malaise, and sometimes vomiting. For mild cases, recovery may happen after a few days and most children recover within a week. However, the virus can be highly virulent in children and may lead to more serious complications. People who have problems in swallowing or speaking should avoid close contact with young children. The Coxsackie group B virus is related to the viruses that cause hand, foot, and mouth disease and other gastrointestinal infections. Its symptoms are similar to those of coxsackievirus infection. This disease is very common and some children have mild infections. The symptoms are generally mild and the infection is easily cured. It can occur at any time of the year, but most cases occur in 09e8f5149f
