Camtasia 2019 Crack mac Videos Video camera accessories VideoQ: Qlist& Question is: how does QList can contain objects that are not QList I have a doubt I am not able to sort out myself, QList list; //list can have a data type as QString Now if I push strings into list, it creates a copy of string into list and may be destroys the original string. Now if I get the list through the function, how can I get the original string? QList list; QString p1("hello"); QString p2("world"); list.append(p1); list.append(p2); list.print(); QStringList list2; QString p3("hello"); QString p4("world"); list2.append(p3); list2.append(p4); list2.print(); I want to print hello and world, instead of printing hello and world and then printing world. QString p5("hello"); QString p6("world"
