#### Earth Live Sharp

- Download free images and set them as background image - Windows Vista, 7, 8 and 10 - Images are taken from Himawari 8 weather satellite - Only in Japanese - Limited edition of five years - High quality (no pixelation) - Low pixelation (114\*114) - 1100\*1100 resolution for lower pixelation - Higher resolution (2200\*2200) for higher pixelation - Support for private CDN - 5 images (Pre-loaded) - Support for 8 image rotation modes - Smooth transition between images - Gif animated images for each orbit Earth Live Sharp is the simplest, most unobtrusive and effective way to see current weather conditions around the globe, right on your desktop. With a simple setup and intuitive interface, you will be ready to spot the next storm in no time. Images are taken from the Himawari 8 satellite that is in a geosynchronous orbit above Japan. Real-time satellite images of the Asia-Pacific region are delivered straight to your desktop. Windows Vista, 7, 8 and 10 support The installation process is simple and straightforward. Simply unzip the application to your desktop, right click on the Earth Live Sharp icon and select "Run as Administrator", and then follow the prompts to configure the application. It is also recommended that you run the setup as a virtual user. Virtual users are convenient because they do not make any changes to system settings, making it impossible for them to be the cause of any unexpected issues. You can also use it as a screensaver and have it run quietly in the background. Even if you're not familiar with Linux or Windows, this application will make you feel like you've been there all along. In addition to the convenient and simple application interface, Earth Live Sharp is also very stable and works quietly in the background. Easy and convenient to set up, this application is probably the easiest and fastest way to have a real-time view of the Earth, right on your desktop. KEYMACRO Description: - Download free images and set them as background image - Windows Vista, 7, 8 and 10 - Images are taken from Himawari 8 weather satellite - Only in Japanese - Limited edition of five years - High quality (no pixelation) - Low pixelation (114\*114) - 1100\*1100 resolution for lower pixelation - Higher resolution (2200\*2200) 1d6a3396d6

# Set your resolution (16 bit per color or 32bit per color) and your desktop size. And you get a smooth image of the earth.  
# Select your desired image size and the interval. (1080p / 16bit) # You can use Private CDN service # Choose whether you want to update the background while it's running or at startup # Set your desired location for the background. # Option to use the location of the current time # Option to use the current time zone # Enable the Autostart # Option to enable the volume icon # Option to minimize the application to the system tray Ancheer is a personal assistant for your Mac, and is now up and running with your Google account.
