## OutlookAttachView Crack+

OutlookAttachView is a small and portable utility capable of extracting multiple attachments from your Microsoft Outlook email account. It comes packed with a wide range of customization preferences for all skill levels. Since installation is not a prerequisite, you can save OutlookAttachView to a USB flash drive or other similar storage unit, and run it on any computer. What's more important is that the Windows Registry section does not receive new entries, and files are not left behind on the hard drive after program removal. Plus, you can keep the app in your pocket whenever you're on the move. The tool's packed in a standard interface with an uncomplicated layout, where you can make the necessary adjustments from the Mailbox Scan Options screen. So, you can select the Outlook profile, specify a date and size range for message scanning, skip the exchange of public folders, create a file type exclusion list, establish "From" and "To" strings to take into account, as well as pick the message direction (incoming, outgoing or both). Once all attachments are displayed in the main frame, you can copy them to an external file, export their information and use a search function when dealing with large amounts of data. But you may also create an HTML report of all or selected items, as well as place an app icon in the system tray area for easy access. The straightforward tool barely uses CPU and system memory, so it shouldn't burden the computer's overall performance. It is very responsive to commands and works well, without making the OS hang, crash or pop up error dialogs. Although the GUI is not visually impressive, OutlookAttachView supplies power users with rich yet intuitive options for extracting Outlook email attachments. OutlookAttachView Requirements: Vista, Windows 7, Windows 8, 8.1, Windows 10, Server, Windows Server 2012 Outlook 2008, 2010, 2012, 2013, 2016 Outlook 365 Outlook for Android, Outlook for the iPhone, Outlook web App 32 and 64-bit OutlookAttachView Help file: [www.outlookattachview.com](http://www.outlookattachview.com) What's New: v1.2.4: Fixed a bug where the title of selected Outlook profile was not set properly. Fixed a bug where attachments were not found in specific folders. v1.2.3: Fixed an issue where some Internet Explorer versions did not work. v1.2.2: Fixed an issue where some Excel files could not be
