AS-LCase License Code & Keygen For PC

You can do more with the clipboard than just copy and paste text. On Windows you can copy text from any application, regardless of its interface language, as long as the application you are using is multilingual. The opposite is true as well. If the text you are copying is in Arabic, for example, it might contain non-Arabic characters. If that is the case, your clipboard will not recognize that text. For example, if the clipboard has the content "Hello World! ", then the application clipboard viewer will show this string as "Hello World" as the text does not contain any Arabic character. Thankfully, AS-LCase exists to solve this issue. When you put the text on your clipboard, AS-LCase will detect all the Arabic text and, with a simple hotkey combination, convert it to all the text in lowercase. AS-LCase User Guide: General Information The software package includes a small icon (a font symbol) to indicate that it is AS-LCase. Changelog v1.0.0 - Initial release; - The name "AS-LCase" was not yet chosen. License AS-LCase is offered under the GNU Public License.
