How to use it? 1. The application consists of three folders. The first one contains the source code. The second folder contains the executable application file and the third folder contains images. 2. Run the application and select the dice type to be rolled. Enter the number of dice to be rolled and press "Roll". Numbers are displayed next to the dice type to show how many of that dice type rolled. Result can be printed on screen or to Notepad. What if all dice types are rolled? If so, then output will be the total of all numbers rolled. 3. Check the files included with application for more examples. 4. Change settings in the application options. The first time you use the program, the options will be displayed and saved. You can change them later from the options dialog. If you don't like the default settings, then you can modify it to get exactly the result you want. Roll the number of dice to be rolled. You will see the option box. From the "Mode" dropdown menu, select the option you want. The default option is "Result" (this is the name of the output file to be created). From the "Print Format" dropdown menu, select the file you want to print (output file). For example, you can choose "Result.txt" or "Result.txt, Result.txt", etc. Check "Show extra info" box if you want to see the outputs. Enter the number of die type to be rolled. What's New In?

Rolls many different kinds of dice: six 4D6DL, six 3D6, four 4D6DL, and three 3D6. All dice are reported to contain either nothing, one or more successes, and one or more failures. It also reports, for each kind of die, the percentage of occurrences of each kind of outcome, along with the average outcome of the dice. That's it. That's all. The application does not create statistics, and it does not print any charts or graphs. It is simply a simple application, intended to provide a quick and easy way to roll many different kinds of dice in a single action. **Escape From Underworld Book** The Escape From Underworld game can be played on tabletop or computer. This is a complex adventure about a small band of people living in fear as the world grows more and more dangerous. Their adventures will take them from Greece to Egypt to China to England to the Battle of Normandy to the city of New York. The game uses a story line and a series of events that people can play in. **Frankenstein's Monster** It's a story about Frankenstein and his monster... Actually, it's all about the monster, because the story is all about the monster. It's a tale of murder, of a mad doctor and his monster, and their ill-fated relationship. In the end the monster escapes his creator, and goes on a revenge tour of the universe, vowing to destroy all the world's scientists. The game has four, five or six game stages. You can play any number of them at any time. You play the monster, and he kills everybody. Or, you can play an alliance of scientists and destroy the monster. **Need to Know** is a classic board game for 4 to 8 players. The rules can be played by two or by one or more people. The game is ideal for those who have heard of "The Need to Know Game" and want to play it. In a single game there is a need to know! Can you guess it? It is from this simple game that other games have grown. **Alan Wake's American Nightmare** Alan Wake is an award-winning psychological thriller set in the Pacific Northwest. Five years after a deadly virus sweeps through Raccoon City, a man goes missing. As Shawn Carr, you begin your search for your missing friend and for the answers. American Nightmare is a game of immersion that draws you into the game like never before. You'll come face to face with a terrifying conspiracy that's been over a decade in the making

and will plunge you deeper than ever into the darkness that has become your home. The Lost Reality Game
The Lost Reality Game was designed for solitary gamers who need an adventure game that they can play
