## **cod mw3 ERROR: Could not find zone `code\_pre\_gfx.ff`**

Mw3 ERROR: Could not find zone 'code\_pre\_gfx.ff'. what is that? i can't start the game - it says me that. Jul 18, 2020  
SteamDB record for depot Call of Duty Modern Warfare 3 english (DepotID or AppID: 42683). zone/english/code\_pre\_gfx.ff,  
ff, 24.02 KiB. Sep 8, 2012 Mw3 zone files download ui\_mp.ff download Localized\_code\_pre\_gfx\_mp.ff download  
Localized\_code\_post\_gfx\_mp.ff download Localization.txt . Jul 18, 2020 A: Ok, you can delete files and folders manually, but  
Steam has a cleaner approach for resolving those errors. All you need to do is to delete this folder:  
%appdata%/software/yoursteamrepo/cache/ Alternatively, if you know exactly which folder causes the error, you can instead of  
a folder delete the file which is causing the issue and then download and start the game. This folder should be the culprit and  
you can delete it safely. The other way is to run steam in offline mode. To check the %appdata% path you can use the PATH  
variable. Open the SET UP or Command Prompt from start menu search or using WIN + X and open the system variables from  
there. Find a variable which represents the SteamPath (example: C:\Program Files\Steam\SteamApps\common\ ) and copy it to  
the clipboard. Now open CMD as administrator, type %appdata% in the prompt and press ENTER. If you don't see the path  
"%appdata%", then you need to add it to your system variables. This path normally contains SteamInstall, SteamPreferences,  
Steam, SteamApps, SteamUser, SteamUserLibraries, SteamAppCache and SteamAppsContentSets. You can add an entry in the  
system variables by typing this: C:\Program Files\Steam\steamapps\common Just remember to delete it after the game is  
working. This can also be done in the SET UP dialogue but I find a cleaner approach in the CMD prompt. Dr. Roger Martin A
