## Hardping

A smart application that can ping devices even if they are behind a firewall. This way you can monitor a network and keep a keen eye on every device that starts a connection to it. While detecting the device, the tool displays the current state of the item along with possible issues. If the item is responding, you will see if it is online or offline, if the connection is made in high or low quality, etc. Possible Issues: Low quality for ping: Due to heavy noise of the ping, the response may have little or delayed. For high quality of ping you can try using the tool. Firewall: For some devices a firewall can be blocking the request, and you may have to try to break the firewall. Not responding: There are cases in which the device does not respond at all, so it means that it does not have network connections. Failed: In some cases your connection to the device might fail due to the network condition. Try to check the network link in case of any interruption. Here's some other applications you may find useful: Random SMS Random SMS is a very useful application that can generate randomly words, numbers, or emojis. These texts can be sent to a remote phone number. This tool does not need an access or connection to any device, just press the button and off it goes. This tool is especially useful if you need to send texts to multiple people, and to avoid spamming them with unnecessary messages. Connection Booster Connection Booster is an application that can increase the speed of the connection or disconnections. It is especially useful if you have a slow and intermittent connection to the Internet. By default it will increase the connection without closing the connection, but it can be configured for any part of the connection. WeChat: WeChat is a very popular application that works the same way as Facebook Messenger or WhatsApp. This application allows you to send texts and images. It can also make calls with the user's account information, and it allows the user to connect to an unlimited number of mobile devices and computers. Twilio: Twilio is a platform that allows you to quickly send text messages. It has applications for iOS, Android and Windows Mobile. You just need to register, and then start sending SMS messages that can reach about 10,000 recipients. It is also possible to make calls, use voice messages or send pre-recorded messages.

## What's New In?

I think there is an argument to be made that the Knobbly Knee Jumper is the most reviled piece of player apparel in the history of football. Well, I'd have to disagree with the argument, but I'll play along, just for shits and giggles. So, what is it about the Knobbly Knee Jumper that's so wrong? Well, I could tell you I got it as a 14-year-old kid growing up in the 80s, then watch my kid brother complain about wearing one of these when he was 6. I could tell you the early prototype of the Goofy Jumper was a literal God-send, as I was a poor kid growing up in California whose family couldn't afford a sweatshirt, let alone a tailored, soft, fleece version of a basketball jersey that said "tuff n lumberjacks." But, like all good arguments, it's easier to explain something than get people to stop wearing it. So let's dive right in. First, what's the Knobbly Knee Jumper? It's a very basic adaptation of the classic New Era "Go Yoke" cap. It's a modern interpretation of the classic stocking cap. In this case, however, the cap is worn backwards, with the front cut lower and the back higher, resulting in a puffy, mushroom-like shape that allows us to look cool while also protecting our knees. This is a classic piece of "Chevy" gear, having been worn by every generation of Dodgers fan from Jackie to Don Mattingly. It always made sense, and in the name of nostalgia, I'm always happy to see it return. While it's true that it never really caught on for a reason, I think it's important to remember that it was a far more popular way to wear baseball caps back in the day. It's sort of like the microdot photos where really short girls in the 70s were photographed in jeans. It was cool, we were weird, and no one wants to be Weird Ronald. But in all fairness to the Knobbly, there are a
