Picard is a simple, yet powerful application that allows you to print out pictures from the clipboard. The app is characterized by its versatility and unique graphic appearance, as it has been designed to be used by both novice and experienced users alike. It supports most of the formats used in printing today, including JPG, TIF, BMP, PS, EPS, PDF, PNG, PPM and SGI. It is also possible to save the images on your computer using a number of application settings. Using Picard, you can easily print pictures, barcodes and monochrome and color images. The default setting automatically generates a picture file when you press the Print button. However, you can always go in and edit the settings to choose a desired destination, width and height, as well as whether you want to print or save the image to your clipboard. Last, but not least, the application features a handful of useful options that allow you to set the default settings for future uses, as well as the properties that are to be saved in the image file.

Screenshots: Description: WxWare has released the wxSwing Edition, which introduces new features and improvements. Now, you can take full advantage of this nifty graphic toolkit without changing the appearance of your current software. The package includes a few extras that can help you perform powerful and useful tasks. For instance, you will be able to save the text on a graphic. In addition, there is a nifty function that enables you to cut out specific parts of a graphic. The last but not least, you can transform a graphic into a password-protected ZIP file. This means that no one but you will be able to open the file and take a look inside.
