Like all of the Keymacros from Ctrl-Alt-Del, Inc., Keymacro is the most flexible solution for corporate and home usage. This application allows you to create macro scripts that may be triggered by keyboard shortcuts or mouse clicks to perform specific actions quickly and easily. Its intuitive interface provides comprehensive support for customizing scripts with an array of options. You may create your own profiles for the different shortcuts, and access them from the main screen. You can assign macros to different groups, or create custom groups. They are saved with a custom name so you can easily locate them in the list. You may combine macros to perform complex tasks. When you run a particular script, a confirmation dialog is displayed in order to allow you to confirm the action before actually performing it. RescueMe.Net Description: RescueMe.Net offers a simple and easy-to-use interface that allows you to easily create backup plans for your important data. You may choose a simple backup or the differential backup, which is more suitable for files that have changed in the past. Once you have defined the data that you want to protect, the application automatically analyzes it and creates a detailed report. It may take up to a minute to create the backup plan, but it will be very helpful in case something goes wrong. NIS Configuration Utility Description: The Network Information Service (NIS) is an older, but still used and powerful option for sharing and storing system configuration data, for example, the public key and certificate for server authentication. It allows you to specify configuration parameters on several domains. If you have to administer your network, NIS may help you in finding information and setting up Windows configuration parameters. It supports NIS 3.2 and shares its database across multiple machines on the network. Atlas.Metasploit.Framework Description: Atlas.Metasploit.Framework is an integrated, script-based framework for creating, testing and sharing Metasploit payloads and framework modules. It contains nearly every payload and module you'll need for penetration testing and exploitation. As such, it's an essential toolkit for many security professionals, researchers, and pentesters. Yolk for Safari Description: Yolk for Safari is a small utility that allows you to configure Internet Explorer (IE) for Safari. It allows you to hide IE, change the user agent, set favicon, and set as home page. You may also launch IE with a 80eaf3aba8
