The program is designed to work with files, folders, and registry keys (including drives). Just drag and drop files, folders, or registry keys on the software, and the files will be encrypted. Dragging a file or folder will not only encrypt it, but it will also open the encrypted files in your default text editor (by default, Notepad). You may change the default program by editing the Encrypt.ini file. The software also enables you to encrypt registry keys and data stores in the registry. This is a powerful security tool, because it prevents hackers from stealing your passwords or any other personal information stored in the registry. Drag File Locker supports multi-users and groups. It will allow you to encrypt files, folders and registry keys shared among different user groups. By default, Drag File Locker will encrypt files in a hidden folder, so the encrypted files cannot be discovered in Windows Explorer. Drag File Locker has an easy to use interface. Drag File Locker provides one-click file encryption. Drag File Locker is available for all Microsoft Windows platforms (Windows 7, 8, 8.1, and Windows Server 2012, 2012 R2, 2016). Drag File Locker is a free application and it is not affiliated to any software vendor. Drag File Locker is a standalone application and does not require third party products. It does not require Microsoft Windows Installer. Drag File Locker allows you to encrypt files and folders in Windows Explorer. The software can also encrypt registry keys and data stores in the registry. Drag File Locker is a light weight and easy to use utility. Drag File Locker is not only compatible with Windows Vista and Windows XP, but it is also compatible with Windows 7, Windows 8, Windows 8.1 and Windows Server 2012, 2012 R2, 2016.
