\* MCC is a free program developed in C++. \* Software registered to iFixit. \* It is installed automatically when you install MCC's helper. \* It is included in the 32 & 64 bits version of the original version of MCC. \* If you are using 64 bits, uninstall MCCHelper before installing MCC. \* If you are using 32 bits, install MCCHelper before installing MCC. \* If you prefer to have both the 32 and 64 bit version of MCC installed on the same PC, uninstall MCCHelper before installing MCC, and run the uninstall.exe of MCCHelper \* The program is updated regularly, so be

---

careful to have the latest version. Find my kids This application lets you find what phone is used to call you. It's easy to use and to handle. You can see the time of the last call, who called, what number or name of the child, if the call was from or to an external number and a lot of other useful informations. The application will warn you about a possible sickness of the child. 1) Guide mode 2) Interactive mode There are 2 modes of the application. Guide mode You are given a list of numbers and names of your children. You select one of the children by touching the

---

phone number or name on the screen. You can try to select more than one phone number or name. Each number or name will be presented on the screen with information of what phone is used to call you. There is a choice between calling the phone or messaging the phone. 1) Calling To call the phone, you just have to touch the name. The phone will ring, if you are not in an active communication with the child. It will even ring through the answer phone if you are not in an active communication with the child. If the child has an active communication with someone

---

else, the application will display the name of the other person. The time you have been warned by the application is listed on the screen. The application has been installed with a mechanism to indicate if the child has a phone. If the child has a phone, the application will only display the last call number to the child. If the child has no phone, the application will display the name of the child.

2) Messaging If the child is online, the application will display the name of the

ATS MultiPage Control Center comes with an exhaustive list of features. It includes the biggest collection of desktop controls and utilities, all aimed at increasing user productivity. It is capable of doing many things, including some really cool things. Its author, after having programmed for many years, has gathered and developed many features that are really unique and different from the rest. It will increase your productivity by: - Adding a "Window Border" to your Windows in order to separate the application from the

---

desktop. - Saving a click on the desktop for later - Disable the Windows minimization by "Push buttons". - Show and hide the windows of all the applications. - Hide the programs that have a screen saver by "Push buttons". - Show the screen saver or change its configuration. - Remove the closed programs, without the need of using Windows Task Manager - Disable the "The system will shut down in 10 minutes" warning - Hide the annoying Windows logo during startup and shutdown - Display or Hide the system tray icons - Allow your computer to

---

hibernate or shutdown - The best taskbar to control your multi-desktop - Display or hide the registry editor - Add or remove a border from your Internet Explorer - Many many more... ATS MultiPage Control Center Download Links: This is a fast and easy way to install, using a CD Image of the most updated ATS MultiPage Control Center v.1.8.1. Downloaded CD image contains a folder containing ATS MultiPage Control Center (self extractor), Make sure you have a valid PC product key (not needed if you have a PC OEM) and Windows XP SP2 or SP3 (not

---

needed if you have Windows XP OEM or Vista OEM). You will find the installer for ATS MultiPage Control Center in the directory it was extracted from (self extractor is an extractor or decompressor program which allows you to easily extract files from compressed archives and most likely will not be in the directory it was extracted to). The directory is "MultiPageControlCenterInstaller-1.8.1-BETA.exe" Unzip ATS MultiPage Control Center Re-run the downloaded installer. Now you will be prompted to insert a key for your ATS software. If you did not extract the ATS

---

MultiPage Control Center installer, when it prompts you for a key, enter the product key from your ATS order.
