Fixes and Workarounds

This update includes the following:

- This update resolves a newly discovered issue in Windows Media Center, where audio playlists saved to a network drive will not work in Windows Media Center when it is restarted.
- This update contains the following bug fix:
 - The instruction to play a video stored on a network drive, while playing a video from a local drive, was incorrectly handled when video playback would switch from a local drive to a network drive. Problem: In the current version of Microsoft Windows XP Professional, Enterprise, Home Premium or Ultimate, the Media Center interface hangs when the user resumes from suspend/resume to an external device. Impact: When a Media Center user resumes from suspend/resume to an external device, the Media Center interface hangs and cannot be resumed. Cause: This issue is caused by the following conditions:
 - User is logged on as a guest.
 - The external device that is used to resume the system from suspend/resume is a USB device.
 - The external device has been removed from the Media Center interface.
 - The Media Center

interface hangs while accessing the external device when it is resumed from suspend/resume.

Workaround: To work around the problem, the following steps should be taken:

- ❑ Log off the user from Windows XP Professional, Enterprise, Home Premium or Ultimate before the user resumes from suspend/resume to the external device.
- ❑ After resuming from suspend/resume to the external device, log on to Windows XP Professional, Enterprise, Home Premium or Ultimate again.

What to do if the fix is not applied:

- ❑ The update is applied.
- ❑ The fix is not applied.

Please note: Only issue the update when the computer is in a clean state. Perform the following before installing the update:

- ❑ Reboot the computer from a recovery environment.

If the update is not applied and the computer is in a clean state, contact your OEM or Microsoft representative for support. If the update is not applied and the computer is not in a clean state, contact Microsoft Technical Support for support.

Resolution: This update resolves the problem described in this article. Learn more To learn more about the importance of patches and the role of Microsoft support, visit the following Microsoft
