KeyMacro is a versatile, yet easy-to-use macro tool, allowing you to record, edit and playback macros to your advantage. You can create looping and nested sequences of actions, defining customized keyboard combination, as well as simulate mouse clicks and keystrokes to perform various common tasks. Using KeyMacro is very easy and intuitive: Start creating your macro and press the "Play" button, to immediately begin the recording of your commands. You can assign hotkeys to any of your actions, which can be even combined with the commands you created so far. This means you can perform long tasks with a lot of variety using only a few keystrokes. Once your macro is done, simply activate it from the "Settings" dialog and use your favorite combination of keyboard shortcuts to automate any task you want to perform. You can also define hotkeys to be used within macro sequences, but these will not be carried over to a new macro. Canoe is a no-frills file explorer that fits right in your Windows toolbar. Among the key features of Canoe are support for multiple desktops, an internal browser, search history and multiple columns. Canoe also allows you to add custom command and control buttons to the toolbar, so that you can perform specific actions on any file or folder. We've highlighted its simplicity, navigation and customization features in our review. Download Canoe Installation is quite simple, so it won't take you long to get your desktop to the "Canoe" look. It comes with a single toolbar icon, but you can make it look just like the default Windows Explorer toolbar by switching on the "Look like Explorer" option in its settings. Key Features Canoe comes with three tabs: Desktop, Favorites and History. The first one is used to access the file's list of available desktops, which you can change by double-clicking on the custom button next to the desktop name. The Favorites tab is used to store or load your search history. All the searches you've made 77a5ca646e
