VirusKeeper is a powerful antivirus and anti-spyware system for Windows XP, Windows Vista, Windows 7, and Windows 8. This application represents a real-time shield that can scan all system files and running processes as well as detect and eliminate active viruses and malware. VirusKeeper has a simple user interface with a clean and intuitive window. It shows the status of the antivirus and anti-spyware application, as well as the last time of analysis. This can be used to locate the last time a suspicious file was found, and to get detailed information about it. A behavioral scan can be performed in three modes: quickly (at-risk and system files), fully (all files), or deeply (all files thoroughly). It can scan the system and all loaded drives as well as analyze loaded third-party programs like Internet Explorer, Firefox, Chrome, Opera, and Thunderbird. The real-time shield can run in normal, game or notebook mode. This mode provides low system resources consumption and allows the scanner to run without any problems in game or notebook mode. The real-time shield can protect system files for keyloggers and track its activity, scan active processes and new or suspicious files, detect spyware in real-time mode, as well as protect instant messenger services, autorun programs, and third-party browser components), net watcher (for running processes and apps in TXT or HTML). Plus, you can schedule a one-time or regular scan job (virus-only, spyware-only, or both) and select the scan type, as well as password-protect VirusKeeper Pro 2011 Full Crack...
