Tess - The Annoying Simple Task

Switcher is a tiny utility that can be run in your system tray to replace Windows's annoying task bar with an annoying task switcher. TAS allows you to see which Windows application are currently running without the need to open each application directly. HotKeysPal is a free application that allows you to assign shortcuts to any combination of hotkeys you like. This way you can save time and concentrate on more important things, like watching the football match, reading a book or playing chess. Toshiba has just unveiled a new laptop prototype which comes with a new flexible fabric-like, bendable screen. The

development is meant to let you watch movies in different positions on your notebook by bending the device around the appropriate angles. RSS Icon for Windows - RSS Icon for Windows is a simple and powerful RSS reader which can display feed title, feed description, feed source (URL) and number of new items per feed. The icons and navigation bar are customizable. Pinboard is a free tool for managing your links. It's designed to do one thing and one thing well: store links for quick reference, or, ideally, bookmark links that you wish to return to in the future. Its tag system is extensible and customizable, and while it works well for links from your browser, it's equally useful as a tool for managing links between

documents and web pages. Ubuntu Tweak is a free Ubuntu customization application that enables users to adjust settings of the Ubuntu operating system to their liking. It is a light and easy to use application.

PulpFiction is an innovative and easy-to-use software that searches the Web, blogosphere and IMDB for your all-time favorite books and movies. It has great integration with your local network (including your Linux file servers), email and calendar. Lynda.com is the online destination for new and experienced web designers and developers. With over 15,000 instructional videos and counting, Lynda.com can help you learn the skills you need to build a career as a web designer. Acrobat Reader 7 Portable is an

award winning PDF viewer for Windows. It allows you to read and search PDF files. PDF files are created to allow documents to be viewed on computers, mobile phones and other digital devices. PDF is an electronic file format for the distribution of text documents. Beagle Desktop Search can index and search all of your files and folders from your computer as

What's New In?

RealTime is a complete Internet and desktop search solution and information management system that finds, organizes,

and presents the information on your desktop or laptop. RealTime instantly scans your home or office network and presents the information it finds via a small popup message window, or it can automatically download the content directly to your desktop. RealTime's toolbar function lets you search for Web pages, stocks, and news stories directly from your desktop. And when you view a Web page or read a story in your RSS feed, RealTime automatically places that content into a special document of the user's choosing. Using its powerful search capabilities, you can locate and download any Web page to your desktop for later viewing. With RealTime, you can quickly access: Personal Information - news,

stocks, weather, horoscopes Home and Work Web sites - always find the information you want, even if it's on your local computer Personal blogs - stay in touch with friends, family, and co-workers - This site requires Javascript. We are not responsible for any damage or loss of your personal data. Description: HDStat is a Web Statistics solution to monitor Web Server Information like: Page Requests (Count) HTML Code Parse Time HTML Rendering Time Image Requests (Count) Image Code Image Parsing Time Image Rendering Time This can be very useful in monitoring the performance of any web site.
