Viewlet Web Site: Storing \*.dll files in App\_Data folder and accessing via web app I'm trying to figure out how to handle (.dll) files in my ASP.NET MVC3 web application. I'm storing these.dll files in the App\_Data folder using this implementation and everything seems to work fine. But when I try to access these files via the new application it fails. The problem is that when I access the file directly or through a browser I can see that it's there and then it works, but through the application I'm having errors. Here's a few of them: '-/App\_Data/Core/Generics.dll' is of a type that is not valid in statically compiled assemblies '-/App\_Data/Core/Generics.dll' could not be loaded. The system could not find the file specified. The first error I thought that it might be the file path, so
