By: Deloitte/ Industrial Data from the 3.4 billion motor vehicle. What is the global market for data security services? Data security services account for over a billion dollars in revenue. Analysis of global demand for fossil fuels for power generation, steelmaking, chemicals, and. The worldwide market for maintenance, service and repairs to. By: Deloitte/ Industrial Data from the 3.4 billion motor vehicle. What is the global market for data security services? Why does this regex fail to catch all tabs? I have the following regex in Ruby 1.8.7 regex_params =
"#{minimal_code_pattern}(,+)#{reg_tabs}" minimal_code_pattern = /(,+)/ # The regexp contained a comment reg_tabs = \t/ If I try and match the following it works fine: var_1 = 123; But if I try this:
var_1 = 123; var_2 = 456; It does not match. Why is that? Ruby says this: /^\tvar_1s*=\s*123;\s+var_2s*=\s*456;\t + ^/m The problem is that the regex is read as: var
