* _Photoshop CS6: A Digital Photography Workflow For Photographers_ (www.amazon.com) * _Beginning Photoshop CS6: Painting With Gimp_ (www.amazon.com) * _Photoshop CS6 Revealed_ (www.amazon.com) Photoshop can be downloaded for free from the Adobe website. However, if you want to buy all the bells and whistles like layers, keyboard shortcuts, and other advanced tools, you'll need to upgrade to Photoshop CC, which comes with \$699 worth of goodies for \$700 (www.amazon.com), or to Photoshop CC Essentials (\$199 for the full version plus \$199 for the bundle), a limited version with fewer options. Even if you do buy Photoshop, there are alternatives to consider. Both GIMP (www.gimp.org) and Adobe Lightroom (www.adobe.com/products/lightroom.html) are free, open-source software that work well for basic and advanced image manipulation. ## Creating a Silhouette

• Paint Brushes The Brush has three size options: Brush (1px), Pencil (2px), and Airbrush (16px). • Paint Over You can draw directly on the image and then build up the image using a soft eraser tool or a Paint Over. • Eraser The Eraser allows you to clean up, fix, and remove sections of an image. You can also use a Eraser to create a screen-print like effect. • Paths Paths let you draw closed shapes on an image that you can fill with color. • Stroke You can use Stroke (with a brush) or Stroke Path (with a Pencil) to create hand-drawn lines. • Gradient You can create a gradient, a gradual color change, with the Gradient tool. You can control the direction of the gradient and have multiple colors. • ReFill You can use the new ReFill tool to apply gradient, patterns, colors, and images to an area of an image. You can also use the ReFill tools to create texture or blur an area of an image. • Adjustment Layers When you edit an image, you can add an Adjustment Layer. You can then choose a filter to adjust the brightness or contrast of an entire image or an individual area. You can add an Adjustment Layer through the Window menu, the Layers panel, the Adjustment Layer panel, or Layer > New > Adjustment Layer. You can also use the Adjustment Panel. You can use an Adjustment Layer to change the look of individual sections of a photo, such as the background, a sky, or a single subject. You can add a layer mask, which lets you make changes to a layer without making changes to the layer below. You can also apply a mask to the entire image with the Hide Selected command. You can also use keyboard shortcuts to quickly apply or remove Adjustment Layer masks to images. • Levels Using the Levels tool, you can adjust the brightness and contrast of an image, one area or the entire image. You can add or remove pixels to change the brightness or contrast of an image. You can use the Levels tool directly from the Layers panel, or use the Adjustments panel. • Gradient Map The Gradient Map tool lets you apply gradient or color information directly to the pixels in an image. You can use the

Q: How to make the image go on the centre of the window I have an image that is supposed to go on the middle of the screen. But when I run my code, the image goes in the corner of the screen. This is my code: from tkinter import * root = Tk() root.geometry("800x600") photo = PhotoImage(file = "Screenshot.png") label=Label(root, image=photo) label.grid(row =0, column = 0) root.mainloop() A: If you really want the image in the middle (or do you mean the window? or window header? whatever) then use place() import tkinter root = tkinter.Tk() root.place(x=0, y=0, width=root.winfo_screenwidth()-100, height=root.winfo_screenheight()) photo = tkinter.PhotoImage(file='StackOverflow.jpg') tkinter.Label(root, image=photo, anchor=tkinter.CENTER).grid(row=0, column=0) root.mainloop() this will place it at the centre of the root window but this may not be what you want. If you are using the window and want it at the bottom of the window, or you mean in the middle then use geometries from tkinter import * root = Tk() root.geometry('800x600+10+10') root.config(background='white') root.title('Tkinter Saves') photo = PhotoImage(file='StackOverflow.jpg') tkinter.Label(root, image=photo, anchor=tkinter.CENTER).grid(row=0, column=0) root.mainloop() The Trump administration is set to dismantle Obama-era rules that prevented states from introducing sweeping carbon emissions regulations, a move officials insist will bolster a vital industry. The U.S. Environmental Protection Agency (EPA) on Friday announced that it will repeal federal standards for power plants, and also withdraw from stricter ozone rules for new and modified power plants. ADVERTISEMENT The EPA is set to roll the existing standards back to before December 2015, which they
